

## DESCRIPTION

### BACnet Point Summary

*Global Configuration (see antrumEye for configuration via web browser)*

Object Name	ID	Type	Description	Notes						
The Device's name and instance are writable properties of the Device object		D	Device See PICS for properties	Defaults to the Panel Serial Number						
MS/TP Port	1	NP	Network Port See PICS for properties	On MS/TP Network Defaults to Automatic Baud and <a href="#">Zero Config MAC</a>						
BACnet/IP Port	1	NP	Network Port See PICS for properties	On BACnet/IP Networks						
test_mode	6	BV	<table border="1"> <thead> <tr> <th>Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Test Mode</td> </tr> <tr> <td>Other</td> <td>Normal Mode</td> </tr> </tbody> </table>	Value	Description	1	Test Mode	Other	Normal Mode	
Value	Description									
1	Test Mode									
Other	Normal Mode									

**Reset:** To reset the gateway's global configuration to defaults, hold the reset button until the blue Status LED illuminates (about 5 seconds) and release. After the reset (about 3 seconds) the green Status LED will blink twice.

### Global Data

Object Name	ID	Type	Description
service_life	7	AI	Remaining runtime (days) until calibration is required

### Per-Channel Data

In the following objects, "{space}" is the space name.

Object ID = 100\*Channel # + Offset

Sensor objects are only present when the corresponding sensor is present.

Object Name	Offset	Type	Unit	Description	Notes								
{space}_contaminated	34	AI	%	Greatest contaminant concentration									
{space}_co	25	AI	PPM	CO concentration									
{space}_co2	1	AI	PPM	CO <sub>2</sub> concentration									
{space}_ch2o	23	AI	PPB	CH <sub>2</sub> O concentration									
{space}_dp	3	AI	°F	Dew point									
{space}_n2o	35	AI	PPM	N <sub>2</sub> O concentration									
{space}_nh3	24	AI	PPM	NH <sub>3</sub> concentration									
{space}_no2	27	AI	PPM	NO <sub>2</sub> concentration									
{space}_o2	30	AI	PPM	O <sub>2</sub> concentration									
{space}_o3	26	AI	PPM	O <sub>3</sub> concentration									
{space}_pm2.5	9	AI	µg/m <sup>3</sup>	PM2.5 mass concentration									
{space}_pc2.5	16	AI	#/ft <sup>3</sup>	PC2.5 particle count									
{space}_r32	32	AI	PPM	R32 refrigerant concentration									
{space}_r410	33	AI	PPM	R410A refrigerant concentration									
{space}_rh	2	AI	%	Relative Humidity	Requires space temperature from antrumEye provided BACnet Device/Object ID for space thermostat								
{space}_temp	29	AI	°F	Temperature	Copied from space thermostat via antrumEye provided BACnet Device/Object ID								
{space}_tvoc	20	AI	PPM	TVOC concentration	Isobutylene Equivalent								
{space}_tvoc_pid	21	AI	PPM	TVOC concentration	Isobutylene Equivalent								
{space}_voc_i	19	AI	-	TVOC index <table border="1"> <thead> <tr> <th>Value</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>&lt;100</td> <td>TVOC concentration decreasing</td> </tr> <tr> <td>100</td> <td>Baseline</td> </tr> <tr> <td>&gt;100</td> <td>TVOC concentration increasing</td> </tr> </tbody> </table>	Value	Description	<100	TVOC concentration decreasing	100	Baseline	>100	TVOC concentration increasing	
Value	Description												
<100	TVOC concentration decreasing												
100	Baseline												
>100	TVOC concentration increasing
